

Innovation in FinTech Software, Data, Analytics, Reporting, Banking, Blockchain & Crypto

Advanced Enterprise Financial Technology Software & Innovative Data Solutions for the Finance Industry

FinTech Software are technology experts specializing in software and data solutions that help FinTech businesses engage, empower and improve their data management, data reporting and data analysis capabilities with a wide range of specialist software products, services and solutions.

Our range of powerful and innovative software tools will bring immediate benefits to your business increasing your capabilities and competitive advantage.

Data Management

We provide an extensive range of Data Management and Reporting solutions designed for FinTech's to maximise data assets, information and business intelligence.

Our products and services can convert and translate data into many different formats and types allowing data to be intelligible between different applications and databases.

We can easily access and work with data no matter where it is located or what application created it. This opens up endless opportunities to businesses using various different platforms ensuring the best is made of important business data.

Migrate your FinTech Data seamlessly with our black box technology which can map and transfer data between different formats, storage systems and types.

Data Reporting

When more advanced data reporting functionality is required sometimes a specialised solution is needed. Our reporting tools are optimised for complex areas of financial reporting where other software solutions are not always suitable.

Rapid Report Development (RRD) also ensures that reports are delivered quickly saving development times and costs with a completely modular and reusable content engine.

Our advanced software reporting tools deliver FinTech reports and business intelligence for specialised and complex areas of the FinTech ecosphere.
